Division of Carson Manufacturing Co., Inc.

To: Master Distributors, Stocking Dealers, Dealers, OEM's, Service Centers, Media  
From: Brett Doughty, Product Marketing Manager  
Subject: The *H-Series* Electronic Air Horn Product Line

## Carson Introduces the NEW *H-Series* Electronic Air Horn Line

**Indianapolis, IN** – Carson Sirens is proud to introduce the new *H-Series* electronic “stutter” air horn line of audible warning products. This line features **LOUD** and **LEGAL\***, professional grade products that incorporate the power of a simulated “stutter” air horn with auxiliary light control and the reliable Carson quality, not found in other aftermarket horn products.

The **HPK-150**  
UNDER HOOD WATERPROOF  
STUTTER HORN SYSTEM

The *H-Series* was developed to enhance emergency light packages in volunteer firefighter privately owned vehicles (POV) by offering a legal\* audible warning solution to those volunteers that work in states that restrict siren use.

Highlighting the *H-Series* line is the **HPK-150 Under Hood Waterproof Stutter Horn System**. This system bundles 3 new Carson products, the **HA-150 Under Hood Waterproof Stutter Horn Amp**, the **SP-200 Switch Panel**, and the **CSP-100B Speaker** into one affordable, easy-to-install horn kit. The HPK-150 can be easily operated using the vehicle's horn ring, or through a separate button or switch. Its compact component design and waterproof, all-weather amplifier provides versatile installation options for any volunteer POV, motorcycle, ATV or marine craft. It is also a cost effective alternative for ambulances, escorts, towing, recovery, DOT, or other service vehicles that are not equipped with compressed air horn systems.

An interior-mount (non-waterproof) version of the Stutter Horn System, the **HPK-100 In-Cab Stutter Horn System**, is also available. This system includes the same switch panel and speaker components as the HPK-150, but utilizes the **HA-100 In-Cab Stutter Horn Amp**. Mounting hardware and installation manuals are included for all system components.

### INDIVIDUAL SYSTEM COMPONENTS MAY BE PURCHASED SEPARATELY!

For almost 40 years, Carson has been an innovator in the emergency vehicle industry. We have built a reputation of rugged, reliable customer-driven products. We understand the hard work and sacrifice of our nation's volunteers and the important role they play in our communities. Through this product initiative and future product initiatives, we will strive to develop products to benefit volunteer firefighters. Just another way Carson is helping volunteers **RUN SMALL, SOUND BIG and ARRIVE SAFE!**

#### HPK-150 FEATURES

##### HA-150 Stutter Horn Amp

- 100 watt, waterproof electronic horn amplifier
- Legal\* for POV use
